

DANMER SHUTTERS: ENVIRONMENTALLY FRIENDLY AND ENERGY EFFICIENT

Did you know that windows are the greatest source of energy loss in your home?

Danmer's patented Thermalite™ Shutters insulate up to 3 times better than wood. Your shutters will actually pay for themselves by lowering your home energy bills while reducing the use of trees from our forests.

With Danmer, you can have shutters that are both environmentally friendly and completely safe for you and your family.

The only 100% non-toxic, flame retardant, water-resistant synthetic shutters that look and feel exactly like wood.

- If you still prefer wood, Danmer's wood shutters are made from FSC certified wood.
- Our proprietary finishes are environmentally safe, non-toxic, water based, and produce low VOCs (Volatile Organic Compounds).
- We use non-toxic formaldehyde free glues.
